[Learning JAVA Programming - Beginner to Master](#) - UDEMY, 02.2025

PROJECTS

Real Time chat website

[Link](#)

- Developed a **full-stack chat application** with **secure authentication** and **real-time messaging** using WebSockets. The app enables seamless communication with support for **file sharing, user presence status, emoji reactions, and persistent chat history**.

Key Features:

User Authentication – Secure login and registration with JWT.

Real-Time Messaging – WebSocket-based instant communication.

File Sharing – Supports images, videos, and audio.

Online/Offline Status – Real-time user presence updates.

Emojis & Reactions – Interactive messaging with reactions.

Chat History Persistence – Messages stored for seamless access.

Tech Stack:

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

Real-Time Communication: Socket.io

Authentication: JWT , bcrypt

SKILLS

Frontend Development - React.js, Next.js, JavaScript, Tailwind CSS, HTML, CSS, Bootstrap, Framer Motion

Backend Development - Express, Node.js, MongoDB, JWT, Bcrypt, RESTful API, Socket.io

DevOps & Deployment - Vercel, Netlify, DigitalOcean

Version Control - Git, GitHub, GitLab

Soft Skills - Problem Solving, Collaboration & Teamwork, Adaptability

Programming Languages - JavaScript, C, Java

VOLUNTEERING

Media Head

Association of CSBS , SGBIT, Belagavi

Led the **media and content strategy** for the **Computer Science & Business Systems (CSBS) Association**, managing **digital content, event promotions, and branding**. Oversaw **social media campaigns, graphic design, and technical content creation**, ensuring effective communication and engagement within the tech community.
