Java Programming – Beginner to Master

Udemy | Completed: February 2025

View Certificate

PROJECTS

Real-Time Chat Application (Full-Stack | React.js, Node.js, MongoDB, Socket.io):

Built and deployed a full-stack chat platform with real-time messaging, secure user authentication, and AI-powered chatbot integration for enhanced user interaction. Designed a responsive, interactive UI with real-time updates and media sharing support.

Key Features:

- Secure user authentication using JWT and password hashing via bcrypt
- Real-time messaging and presence tracking with Socket.io
- File sharing support for images, audio, and videos
- Emoji reactions and clean chat interface with Framer Motion
- Persistent chat history stored in MongoDB
- AI Chatbot Integration for automated responses using OpenAI API (or similar LLM)
- Fully responsive design using React.js and Tailwind CSS

Tech Stack:

React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io, JWT, Framer Motion
